Single-run survival audit under visual noise and wind

Final survival (%) at the 128-step cap; one training run per condition

	Global JEPA	Grid JEPA	Flow pixels	Flow latent	Real CNN	Center rule
No noise / still	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
No noise / wind	**99.2**	**93.8**	**93.8**	**96.5**	**98.4**	**99.2**
Frame noise / still	0.0	**100.0**	**98.0**	**98.8**	**100.0**	**100.0**
Frame noise / wind	0.0	0.0	**97.3**	0.8	**95.7**	**99.2**
Episode noise / still	0.0	2.0	**98.0**	51.2	**100.0**	**100.0**
Episode noise / wind	0.0	0.0	**94.5**	0.8	78.1	**99.2**

State-blind alternation also survives all still worlds in the edge-start check.

Survival alone does not certify feedback. Each cell: 256 episodes, one training run.
